

NICOLÁS BONNET

nbonnetm@gmail.com | 787-567-4107 | Warren, RI | **Portfolio:** <https://nbonnetm.github.io/>

Education

Boston University - Master's of Engineering in Biomedical Engineering

Expected 05/28

Rhode Island School of Design - Bachelor's of Fine Arts in Industrial Design

09/19 - 05/23

Relevant Coursework

Engineering Mechanics - Statics | Electric Circuits | Intensive Introduction to Computer Science | Probability, Statistics, & Data Science | Chemistry for Engineers | Intro to Solid Biomechanics (ongoing) | Biomedical Signals & Systems (ongoing)

Projects

BU Robotics Club - "Exoglove" Project

Current

Leading a group of students in developing a mobility-aiding robotic glove. Roles include development of sensor-based circuits, maintenance of a collaborative CAD document, testing of silicone actuator designs, and overall project management.

Optimized Truss

02/26 - 05/26

Class-specific group project developing a structure made from acrylic strips which could withstand a pre-determined load. Wrote MATLAB code to test and ideate truss designs before comparing software results to real results of constructed truss.

Work Experience

Ward's Manufacturing- Manufacturing Technician (FT)

10/24 - 05/25

Developed production and finishing techniques under guidance of CEO/head engineer of a metal fabrication startup. Adhered to lean manufacturing philosophy while delivering quality results under tight tolerances. Ran and operated state-of-the-art fiber laser cutting and CNC press-brake technology to fabricate custom products.

Vanson Leathers- Leatherworker (FT)

02/24 - 10/24

Crafted high quality leather garments using precision stitching from piece-by-piece assembly to final product, including tailoring and repairs. Mastered and trained employees in over 50 styles of stock and custom luxury products.

Skills

Fabrication

Laser cutting | 3D printing | Breadboarding | PCB Soldering | Sheet metal fabrication | Metal machining | Machine sewing | Mold-making | Silicone casting |

Software

SolidWorks | Rhinoceros 3D | Git | KiCAD | Microsoft Office | Arduino | Adobe InDesign | Adobe Photoshop | Adobe Illustrator |

Programming Languages

Python | C | MATLAB | JavaScript | HTML

Volunteering

Hasbro Children's Hospital- ER Volunteer

11/24 - 05/25

Volunteered as a patient and family representative in the ER. Supported child life staff to ensure a comfortable experience for families. Designed educational tools to help Child Life Services explain medical procedures to pediatric patients.
