

NICOLÁS BONNET

nbonnetm@bu.edu/ (787)567-4107 / Warren, RI

Portfolio: issuu.com/nicobonn/docs/portfolio_v5

Education

Rhode Island School of Design

BFA, Industrial Design

Boston University (in progress)

MEng, Biomedical Engineering

Objective

Seeking a part-time position with a focus on human-centered design. Currently pursuing a post-secondary degree in biomedical engineering with a focus on ergonomic and mechanical design. Looking for an environment where I can contribute and continue developing my skills in human-centered design, prototyping, and manufacturing techniques.

Skills

Design

Ideating
Pattern drafting
Prototyping
Manufacturing design
Soft goods
User testing

Fabrication

Laser cutting
3D printing
Sheet metal fabrication
Metal machining
Machine sewing
Mold-making
Woodworking
PCB Soldering

Digital

SolidWorks
Rhino 7
Adobe Creative Suite
Keyshot 10
KiCAD
Microsoft Office
Programming
Python, JavaScript, C

Soft Skills

Spanish- Native fluency
Inventory management
Fast learning
Client management
Customer service
Project management

Work Experience

Ward's Manufacturing- Manufacturing Technician (FT) (Oct. 2024- May 2025)

Supported CEO/head engineer at a metal manufacturing startup to increase production efficiency and assist in part design. Operated state-of-the-art fiber laser cutting and CNC press-brake technology to fabricate custom products.

Vanson Leathers- Leatherworker (FT) (Feb. 2024-Oct. 2024)

Crafted high quality leather garments using precision stitching from piece-by-piece assembly to final product, including tailoring and repairs. Mastered over 50 styles of stock and custom luxury products, including jackets, racing suits, and high-end bags.

Site Specific LLC- Carpenter's Apprentice (FT) (July 2023-Feb. 2024)

Apprenticed under skilled carpenters and journeymen to build and renovate high-end residential and commercial construction jobs. Developed protective solutions for new and existing installations, installing new materials and millwork, learning critical carpentry skills, and maintaining cleanliness.

RISD Industrial Design Woodshop- Monitor/TA (PT) (Sept. 2022-May 2023)

Managed a college-level wood shop which included enforcing quality assurance and safety protocols, managed projects, set production strategy, advised student projects, trained students, and supported a creative environment.

Volunteering

Hasbro Children's Hospital- ER Volunteer (Nov. 2024- Present)

Volunteered as a patient and family representative in the ER. Supported child life staff to ensure a comfortable experience for families. Designed educational tools to help Child Life Services explain medical procedures to pediatric patients.

Related Coursework

Design for Extreme Environments

NASA-affiliated course focused on rapid, full-scale prototyping and designing spaces and systems for specific needs in environments in outer space. Designed a version of crew quarters for ongoing development of a habitat that will house astronauts on Mars and the Moon in the future.
